

MEGAİZO FILE S902

Textile glass-fiber mesh, weighing 75 gr/m2, used along with waterproofing products in order to minimize the cracks, which may emerge due to tensile stress.

Usage Areas

SKU: 054.S902

PRODUCT DESCRIPTION

Usage Areas

- Megalzo File is laid between the coats of the cement, acrylic and bitumen based waterproofing materials.

Application Procedure

• Applicability

The product is placed in between the primary coat and the secondary coat of waterproofing materials applied in double coat in order to prevent the formation of crack due to tensile.

Connsumption

1 roll can be applied to some 100 m2 surface area.
